

Introducing Microsaic Services

Scientific and Engineering Expertise

Providing value innovation for your products

Analytical instrumentation turnkey provider

With over 20 years experience in analytical equipment, microengineering and applications, our team is now offering their expertise and experience to clients.

Do you need assistance in bringing your concept to life?

We design, develop and manufacture your ideas. Offering solutions from proof-of-principle design all the way through to transfer to manufacturing and large-scale manufacture of your product.

Utilise our Engineering expertise

World-class physicists, chemists, engineers, and applications personnel with over 70 patents.

- Experts in microengineering
- In-house software team
- Proven turn-key instrumentation providers.

Concept Design – Design engineers, physicists, chemists and software developers at your disposal to bring your concept to life.

Manufacturing – Provide transfer to manufacturing services and offer small to large scale manufacturing support. ISO9001:2015 approved PDCA processes.

Software development – With our in-house software team we ensure that all aspects of your product development are covered.

Experts in providing turnkey solutions for your needs
