

Introducing Microsaic Services

Laboratory and in-field testing

- 50+ Customers served
- 80+ Cited publications
- 20+ Years of experience

Method development by our analytical experts!

Microsaic offers method development services for analytical chemistry worldwide. If you are struggling to set up analytical methods for your lab we are here to help. With highly skilled analytical chemists we can help you develop the methods you need on **ANY** analytical equipment.

Do you need assistance in Synthetic Reaction Monitoring? We can help

develop method, loan instrumentation or even analyse your samples for you. These includes but are not limited to:

- Pharmaceuticals
- Flow chemistry

Taking environmental testing a step further!

Offering both lab and remote analysis for:

- PFOA and PFOS
- Opioids
- Pesticides
- Antibiotics

Analytical Services – We offer a range of sample analysis options both lab-based or onsite, providing our customers with the flexibility they need.

Method Development Services – We can provide our expertise in analytical chemistry to solve your problems on ANY instrumentation, worldwide.

Installation on site – If you don't have the budget for you own equipment we offer a rental service, which includes installation and training and even an expert to help run your samples if needed.

Experts in providing any analytical solutions for your needs!
